

# Benefits of using PV technology

- **Reduces dependence on foreign fuels** (energy security)
- **No greenhouse gas / CO2 emissions** (global warming)
- **No other air pollutants** (additional environmental protection)
- **Reduces energy bills** (energy, fuel, and demand charge components)
- **Inflation protection** (no fuel charge – ever!)
- **Highly reliable / low maintenance**
- **Delays capital investment for new power plants**
- **Creates jobs, promotes economic growth**
