

Solar Hot Water System Incentive Program

Home Energy Audit Affidavit

Energy costs are continuing to rise, and in Florida the energy we use to cool our homes can account for more than a third of our energy bill. A Home Energy Audit will help you find out how much energy your home uses and determine ways to improve the efficiency of your home.

To receive the full benefits of an energy audit, be sure to implement the home improvement recommendations. This will enable you to run a more efficient home, lower you energy bills, and increase your comfort level.

An energy audit will help you assess:

- Air leaks and Insulation
- Heating and Cooling Equipment
- Lighting and Appliances
- Energy Vampires
- and how to monitor your Energy Bills

Energy audits can be provided through your utility provider, some government agencies, or private companies. They can be accomplished by someone coming out to your home, or you can do your own energy audit on-line. For more information on home energy audits, contact any of the following groups:

- OUC • call 407-423-9018 or on-line at www.ouc.com/home/audit.htm
- Progress Energy • call 1-888-302-8348 or on-line at SavetheWatts.com
- Energy Star • [Home Energy Audit](#) or [Home Energy Saver](#)
- U.S. Department of Energy • [Do-It-Yourself Home Energy Audit](#)

I, _____, certify that an Energy Audit has been completed on
Print name
the building which I have installed or plan to install a solar hot water system, as required by the
Orange County Solar Hot Water System Incentive Program. The energy audit was performed by

Name of company or individual who performed audit - if done on your own, provide Web site where audit information was acquired

on _____.
Date completed

Signature: _____ Date: _____
