Subject: Family Driven/Youth Guided Services

Effective Date: 1/24/2011

Revised Date: N/A

PROCEDURES:

Wraparound Orange understands that service provision cannot be delivered effectively without heavy involvement and input from the youth/family being served. To this end all collaborating Wraparound staff must ensure that service recipients' goals and wishes are known and notated as a major part of the service planning and implementation process.

The Wraparound Orange Management Team must ensure that every step of the service continuum contains input from the family to ensure that they understand completely and approve of the services they are receiving. This input will be used as guidance for the service process in tandem with recommendations from the service providers.

- Family/Youth files and notations shall reflect the wishes and goals of the family as well as the
 goals of the service provider for the family. Notes shall reflect the discussion and the final
 decisions made by the family/youth and provider together. These notations should be sought
 out during clinical peer review sessions and audits and inspections to ensure that these
 measures are effectively carried out.
- 2. Ongoing surveys will be conducted to obtain the opinions of the family/youth on how well these measures were carried out throughout the service provision period and will be tailored and individualized to each client.
- 3. Families and Youth will be informed of the grievance process upon their entry into services and that they may file a grievance if they feel their input is not being adequately considered during the service period.
- 4. Families and Youth will be recruited to serve on every governance structure level of the Wraparound Orange project. Ongoing community events will be utilized to recruit families for both the wraparound structure and the local chapter of the Federation of Families.
