## SCOPE AND PURPOSE OF DOCUMENT

---

The Orange County Fee Directory was developed for use by persons needing reference to fees and user charges levied by the various entities under the Orange County Board of County Commissioners.

This document was compiled from information provided by individual governmental units of Orange County. Users of this document are cautioned to consider its value only as a reference source and not as a legally binding document.

“Business” fees such as solid waste charges and water utility fees appear separately on the Orange County website.

It is the policy of Orange County to compute fees for the purpose of cost recovery. Fines and penalties are typically not included in this document.

- *See the Public Records Policy on the following page.*

### **Public Records Policy**

It is the policy of the Orange County that all records shall be open for personal inspection by any person, unless those records are exempted under the terms of Chapter 119, Florida Statutes.

For the purpose of this policy, access to public records is allowed during normal working hours – Monday to Friday, 8:00 a.m. to 5:00 p.m. The County will make every effort to respond fully to all public records requests within a reasonable time.

If the nature or volume of public records requested to be inspected, examined or copied is such as to require extensive use of information technology resources, or extensive clerical or supervisory assistance by personnel of the County, or both, in addition to the actual cost of duplication, a special service charge will be assessed. This service charge shall be based on the actual cost incurred for such extensive use of information technology resources and/ or the labor cost of the personnel providing the service based upon the actual labor (base hourly salary) of the employee who performs the task.

### **Special Service Charge**

1. The special service charge will not be charged unless the estimated time for fulfilling the request exceeds 15 minutes.
2. The County may also charge for an employee to sit with the requestor during the course of the inspection, to safeguard and protect the County's records from theft, destruction or alteration.

### Technology Services.

1. Email Retrieval.

- ii. Fees for retrieval of other records maintained by ISS shall be computed based upon the actual time to retrieve the records and at a rate of \$12 per hour.

### **Deposit.**

The records custodian will provide the requestor with a cost estimate for fulfilling the public records request. If the estimated cost is less than \$100, the requestor shall be required to pay the full amount before the records custodian will begin collection, duplication and/or redaction of the requested records. If the estimated cost exceeds \$100, the requestor shall be required to pay 50% of the estimated cost before the records custodian will begin collection, duplication and/or redaction of the requested records. Upon completion of collection, duplication and/or redaction of the records, a cost invoice will be provided to the requestor which reflects the time and expense incurred to fulfill the request. Monies collected exceeding the actual cost incurred by the County, shall be returned to the requestor.

### **Unpaid requests.**

If a requestor has any outstanding public records requests for which the County completed the work to fulfill the request but has not received full payment, the requestor shall be required to pay for the previously unpaid request(s) before the County will process a new public records request.

2. Does total impact to wetland or surface water increase by more than 10% or 0.5 acre?
3. Does the modification cause or contribute to water quality impacts not in the original permit?

---

## Planning, Environmental and Development

---

4. Will the modification reduce the financial responsibility mechanisms in the original permit?
5. Will the modification result in a reduction in the on-site mitigation or conservation easement?
6. Does the modification require a new site inspection or evaluation?
7. Does the modification require a variance to County Code?
8. Does the modification require a public hearing or consent agenda approval by the BCC?
9. Does the modification otherwise substantially change the design of the activities or permit conditions?

Environmental Protection fees are not refundable. Fees are subject to indexing based on the increase in the consumer price index, or 3%, whichever is less. Fees may be rounded up to the nearest whole dollar amount.

### **Architectural Standards and Guidelines for Commercial Buildings and Projects**

\*Refer to the Environmental Protection, Fire, Health, Planning, Public Utilities Engineering and Construction, and Zoning sections of this directory for associated plans review and inspection fees, and to the Fire, Highway Construction and Sheriff sections for impact fee information.

Review and Inspection Fees will be adjusted in accordance with Florida Statutes 553.791.

\*\*Pursuant to the Florida Power Plant Siting Act, Chapter 403, Part II, Florida Statutes, a local government may only charge an “appropriate fee” and mechanical equipment directly related to electrical power generation as a disproportionate part of the total valuation. Therefore, the Board of County Commissioners deems it appropriate, in those situations of construction permitted under Chapter 403, Part II, to value mechanical equipment directly related to electrical

power generation at a rate of twenty-five percent (25%) of the actual cost of such mechanical equipment in the calculation of “total valuation” hereunder.

The following minimum schedule of valuations shall be applied to the structure(s) for which a permit is filed. However, should the contract valuation be greater it shall be used for determining the fee. The type of structure(s) shall be determined in accordance with the Florida Building Code, as now adopted or hereafter amended, to identify the applicable valuation(s) set forth below. The applicable valuation(s) shall be multiplied by the square footage of the structure(s) for the purpose of charging the inspection fee in accordance with the fee schedule.

### Electrical Permit Fees

(A) Electrical permit fees are based upon the total amperage of the service required to meet the needs of all fixtures, etc., installed. Service is determined by the KVA Load available to the premises (Refer to Paragraph C for charges not requiring a change of service).

Normally one Electrical Permit is required for each recording watt-hour meter service. Should circumstances (as determined by the Building Official) make it more practical to issue one permit involving more than one service, the fee shall be calculated using the sum of the fees of all individual services included in the permit).
